I have learnt so much from you while working together for The Humanoid Project 🤖 We have together lived all those small victories, recruitments, getting sponsors, facad, orientations, Tech Expo and what not! Your Inter-IIT helped us a lot as well and made our lives easier 😊😊 You are one of the smartest minds I've met in IITB and I'm glad that we got to lead a team together where I can tag it on YearBook as well now 🙏🙏

Rohan you've always been the most trust-worthy friend who is always there when needed! An absolute teamplayer and too much fun to hang out with :) All the way from the EE309 group project we've only grown stronger and closer friends every semester... the most diligent and accountable person to have on your side... All the times we talked about random stuff, all the time we chilled randomly in either room, all the sankalp pune jokes, and coining the nickname bhamru itself... You're the gem of the infinity gauntlet chusariro! Don't lose touch my friend :)

ROHANNN, I am soo excited that you'll be living in Hyderabad now ❤️🇮🇳. I first saw you during our Analog Circuits tutorials and wondered why this ENERGY BRANCH CHANGER was asking so many doubts. Then we unexpectedly met during the Goa trip, where I used to crack all those silly jokes sitting beside you. (Also remember how I selfishly kicked out Ronil at night 😊 to sit beside you?) Back in H2, I miss all those short-sweet talks and the funny conflicts you had with Bhatla (missing out important pages while sending notes 🙄). Final year was the year I really came to know you. You are undoubtedly the sweetest person I've met, who simply loves to help people out. If I had any trouble with BTP II or DSA you would be the first person I would run to (because Bhamru was always in Pune 😊) and the joy in your eyes just showed how much you enjoy helping people out. All those RL stuffff I made you do 🇮🇳, in spite of you not even knowing what an MDP is (I am pretty sure you can't define it even now :). On top of that, Bhamru and I used to make fun of your math skills, giving you random probability questions and seeing your expressions while solving them 😊. You used to greet me with all those "mid fives" whenever I came to your room and that's how I used to find out something was troubling you when you didn't. I still remember you running to the HPC lab with your brush 🇮🇳 and staying there all night just so that Bhamru and I wouldn't be behind you on the project work while you worked on your paper. Just one small thing, don't easily get swayed or influenced by others' opinions and believe in your own thought process (for instance, working for a year before doing MS). Also, rectify your SLEEP SCHEDULE you nocturnal🇮🇳animal! I don't exactly know what you do (don't know what kind of Electrical Engineer I am 😊), but I do know you put your full heart into whatever you do. You and Bhamru were the best things that happened to me in college, of course after my APs 😊. When I meet you in the US in about a year or so, you better be the same innocent and sweet guy who's weak in probability😊.

Hello Rohan! First year was fun with you, from competing for pokemons on discord, all those dese VCs (featuring your dogs), to discussing DS203 on that group of ours. You have been a tech guy from day 1. I remember how you would somehow try to include elec/coding even in energy DIC projects lol. So glad to see you lead the interiit team and be so passionate about what you have always loved to do! Good luck at Oracle. You have been such a sorted person since the day we met and it carried forward through 4 years of IIT with such ease and discipline. Thank you for all the tech help you have given me (with little to no context lol and you still managed to solve the issue) over the years and all the long chats. PS: The money plant is still alive and well, I will take it with me to H10. Bye

Big man Kalbag! The best roommate I could ever have. Fam you're the first buddy I made in college starting from the WA VC followed by late night Gmeets, EN101, church street and Gokarna. Life only got better when we all got to campus and I am so glad I had a roommate like you. From blasting music in the shower to midnight discussions, we've done it all. Your growth through this is exceptional from the young and shy boy who would have panic attacks near 'A Romance' to a man who became an exemplary IITB contingent leader. The numerous memories and special mentions I have would go through the word limit here but one thing is for sure, I'm really grateful for having you in my life. You've been an inspiration and I kid you not, I have worked my ass off to replicate your work ethic. Your simplicity and humility is your greatest asset and never think less of yourself fam. Every match and every game of basketball that you've showed up for me hold immense value to me. I was never able to express it back then but you backed me when I was in tough spots. Time to conquer Hyderabad now that you've finished Mumbai. Cheers to a bright future and more adventurous memories together

Macha you are one ball of good vibes only, being with you feels like I have come back to Bangalore da. You are such a pro at whatever you do, whether it is hardware or software, you are truly a Prohan. No one does imitations better than you, especially the Shivaji Nagar one. You have such a wonderful attitude to life, having fun despite the immense workload you have, whether it's making time for your favorite PC games, exploring Mumbai solo, drone photography, building cool hobby projects, going out with your buddies for a beer (I really miss the Kubec outing da). You have the sweetest heart and such an inquisitive mind, always trying to build new things and learn new software skills, I really admire that. I am happy that you took up the position of Inter IIT Tech lead and pushed yourself outside your comfort zone. You are unstoppable and I can't wait to see the amazing things you will achieve. Always stay in touch bro 🤝❤️🤝

Rohan daaa, * handshake and thumb flick, just the usual * I can hear "what ra Sudeep, too much cock you're showing" XD Dudeee, inspired by you, I bought my first oversized T-shirt. We could have been BTP-buddies under Patkar, but I made him give me an FR 🤝 I loved how excitedly you used to tell me about the compilers course. It was great discussing all that with you, man. We worked the closest during Inter-IIT Tech. I guess it was outside both our comfort zones, but man did you pull it off. I saw how hard you worked, all those sleepless nights, prepping the teams, etc. IITB came third (I hope I remember this correctly)! Amazing job, da. Crush it in Oracle!

Hey Broo! I don't know whether you remember, but first time we properly interacted was when you coincidentally met me while cycling, after our 4th sem endsems got over and when we were staring into unknown future of our team☺. From that moment till the handing over, what a journey it was! So many challenges, learnings and finally we saw some light at the end of the tunnel. One of my most dearest memories of my college time. Also not to mention the countless number of times you helped me debug, 'repair' python, the FPGA assignment of mine(OMG never doing that again☺). You always inspired me by how much you worked hard, and how machau you were in your academics. If there is any such thing as ideal IITBian, you are definitely one - super smart, hardworking and ability to get things done and succeed. I hope we will keep meeting very soon again and again, one of my fondest friends from insti.

Aditya uh, sounds damn weird bro (remember the reservation you made as Aditya in IBC). I prefer Panpesh, PPPOOPOO, Panpa. Brdr I have saved ur name in my phone as Panpal. One of my closest friends in Insti. To randomly running into you in fourth sem, to postponing road trips for you, we've come a long way. You have always got the most strategic room location, at H17 just beside the lift, even at H2 (just a few steps away from the mess), your room has become the postal address for Bengaluru gang. I have spent a significant fraction of my insti life in your room ☺. I'm so glad that we spent so much time together in our last year. I have not missed many lunches, snacks and dinners at H17, solely due to your phone call ☺. Thanks for listening to my non-stop blabbering, being the h17 terrace gangster, 2 am Amul veg momo partner, being there in both the ups and downs of insti life. Glad to have run into you, I will cherish the time I have spent with you in college. Gonna really miss playing Deal, Imposter, having deep discussions in your room or on the corridor. Man's gonna be printing some heavy money in some time, Rishabh and I are waiting for ur runners treat (Europe Trip). PS - Best auto gang ever - Me, U, C-Dawg. Keep calling my man ♥☺

Sriram Al-Gaib ☹. The puneri-tamilian that bangalore deserved. From the first time we interacted online after EE224 (after I saved John Lennon using Boolean Satisfiability) and vibed on Beatles, Guns-n-Roses to vibing on Himadri terrace at 4 am on the last day of insti, even when you had your BTP-II pres in the morning, man, you're the coolest DR-1 ever. Your playlist, optimism, enthusiasm, cs684 notes and love for the gym is something I will never forget. I will always remember the discussions we would have in the mess, and your attempt at rizzing up the chick in the lift before Dune 2. Thanks for being such a nice friend. Ace it at Stanford, please give me a call when u donate 400 CR to IITB and rename Infinity Corridor to Aditya Sriram Infinity Corridor "ASIC" (All Comp Arch guys pls mark attendance here). Keep in touch beb ♥☺

PRANAV !! You're the most focused, determined, kind and down-to-earth person I had the privilege of meeting in insti. I am so glad that you were such an integral part of my insti life, building THP into the team it is today, alongside you was so enjoyable. I will always remember and miss the deep conversations encompassing a diverse set of topics, that we would have every single night returning from TL to our hostels. I haven't seen anyone so

enthusiastic and passionate about RL, robotics and controls ever before. I am really thankful that our paths crossed at insti and I will cherish our friendship for life. Would love to see you play the Harmonium sometime in the future 😊. Wishing you all the best for whatever you do in the future, feel free to call me whenever you want (not just for "python" doubts 😊).

Kalpeeeeeee, from the first time we met on Church Street to the metro ride after the wayanad trip which got off the group chat, we've grown. Good idea btw, definitely we did "full masti" in elec. Your enthusiasm for every single thing in the world is so crazy, from being the mega Chelsea fan, StarWars geek, movie and tv series binger, the gang's sports know-it-all, mentor gymbro, to revising all of Ed Sheeran's songs just before his concert. I'll always remember u as the chad with that chuntu macbook in bag, running a 100 tabs watching 3 matches, doing a moodle quiz, solving codeforces at the same time, literally living in Panpa's room. Bro packs so much compute in so little space, so crazy optimized, System Architects and VLSI Engineers should learn how you work from the inside. Keep acing exams like u do with just a few hours of prep. Man we've been through some crazy shit, ups and downs of life. I'm so glad that our paths crossed. I'll miss you being my look-ahead-thread in all EE core courses. Ace off in Georgia. You'll be my first call when RCB wins the IPL in the near future 🙌❤️🇮🇳

Chuju, you're the perfect mixture of ingredients (Punjabi, Delhi, Bangalore, Pune, Japan, Smart) to a legendary cocktail just like Juju's spl OMR. Having you in EDL was the best thing ever, man we bonded there. The CHU of CHU-SA-RI-RO : The perfect course project team ever (people call our team "the infinity gauntlet thanos never had"). Man the number of AAs this association has generated 🤯🇮🇳. Bhai i'm so gonna miss our generic bakchodi, outings in Mumbai, sessions at Sunny, Sunlight, Acad and Elec RR. Really grateful that our paths crossed at insti. If you ever need a drinking partner, you know who to call 🙌. Have fun creating Nepalīs in Japan 🇮🇳

My man ALB, you're like a Lvl 100 pokemon holding an Exp. Share, a godsend for the entire party. You've been through all kinds of experiences in life, emanating so much knowledge and there's so much I have learnt as a person about life from you. H2 282, The GOATed room of insti. Best Roomie 4 Life. You've been more a mentor than a friend heavily shaping me into who I am today, I would have been a completely different person had I not run into you for which I'm extremely grateful. SO MANY MEMORIES with you brother. Bakri boss, you're family, know that I'll always be there for you. Thanks for everything

C-Dawg !!! Bangalore boy, RCBian, DD to B.Tech BCer, campus kannadiga, H2 wingie, H17 wingie, Tensor gawd, Amazing driver, sexy kannada playlist. Cdawg you've been the one constant throughout the insti journey we have shared. I cherish every moment spent with you roasting CSK fans, to deep conversations on life. We started and ended our journey at insti together. I remember on the first few days of insti (tho online) the day you contacted me in first sem, that screenshot of CMR Accelerate marathon tshirt. To the first iitb in-person meetup in Blr at church street during covid. We witnessed the creation of OG Auntie ki Fantasy group. From this to being my +1 on the full campus walk tour on the last day ☺. Chirag maga, know this, yavagadru, yenadru aagli, nin ee geleyakke ond call maadre saaku ☺. Wishing you all the best, "Bain ka loda", you're an amazing person, and I'm delighted that our paths crossed in this life.

An amazing senior, I interacted with him when he was the TA for CH105 inorganic. His love for chemistry was evident in the way he would take the tutorial sessions. Attending the sessions helped me get a very good conceptual understanding of the topics as well as my interest in the course was greatly impacted. Thanks a lot Anish. Wish you all the best for your future. Hoping that our paths cross sometime in the future.

An amazing senior, got to interact with him during my time at NSS in my first semester. We worked on making educational videos for OLI at NSS. I recollect having some fun discussions, and team bonding icebreakers with him. Always approachable for acad related advice as well. I wish him all the best for the future.

Archishman is an amazing senior. He is the legendary godfather of the EE department. Anything related to core, the first name which comes to mind is Archishman. Always approachable, I can recollect the time he welcomed us branch changers to the EE department, through a short and sweet introductory session, followed by an amazing violin performance. Often while walking to my room in wing 4 of H2, I have been stopped by the melody of his violin at wing 1 after he would stop, only then would we be on our way. I wish him all the best for his future.

Divyansh was my CG during the 51st MI. He is extremely knowledgeable in the tech domain, and also a awesome senior. Worked under his guidance on the MI App. I worked on some really cool stuff to realise this app from an idea. The emotions, cake cutting and pats on the back we received when we launched this app was phenomenal. We had some amazing pizza, time pass. Going on stage with the MI team during homecoming, chanting the MI anthem literally gave me chills. I will cherish the memories made during my MI co-ordinator tenure with him. I wish him all the best for his future.

Dibyojeet is a really cool senior, he was my TA for the course PH 107. Very approachable and knowledgeable about the topic Quantum Physics, his amazing and interactive tutorials, notes and fundae improved our understanding and helped us ace the course. He would often post memes about the topics covered in the course and motivate us with his guidance before the quizzes, midsem, endsem. I wish him all the best for his future endeavors.
